Thomson lifting column solution boosts production ergonomics

Lifting columns increase efficiency, comfort, and convenience; offering easy installation and high performance in a range of medical and ergonomic applications.

Recently, Videojet Technologies Inc., a leading manufacturer of coding, printing and laser marking products, had moved from typical stationary workstations in their factory to using mobile custom cart workstations equipped with Thomson LC2000 lifting columns to move the work surface up and down for operator comfort and ergonomics.

Introduction to Thomson's Motorised Lead Screws

NEW Stepper Motor Linear Actuators offer several advantages over traditional solutions

**Wednesday,
 May 20th, 2015 at:**

WEST (London, UK) 2 p.m.
 CEST (Berlin, Germany) 3 p.m.

Precision engineered to be compact, powerful, quiet and efficient: the new Motorised Lead Screws combine a hybrid stepper motor and a precision lead screw together in one compact envelope.

You are invited to be one of the first in Europe to know about the new Motorised Lead Screws from Thomson.
See first-hand how the patent-pending Taper-Lock technology allows quick decoupling and secure, properly aligned connections and offers several advantages over a traditional solution.

Quick and easy sizing and selection of the "just right" mechanical motion components

Thomson offers the largest range of mechanical motion components – standard and modified to your needs:

- Round and profile rail bearings and guides
- Ball, lead, glide screws
- Linear and precision linear actuators
- Linear motion systems
- Clutches and brakes
- Gearheads
