

Save Time and Cost:

Expanded Micron MOTIONEERING® Identifies The Optimal Gearhead For Your Application!

Visit www.micronmotioneering.com now to access our improved and expanded sizing and selection tool for Micron TRUE Planetary® Gearheads. Micron Motioneering is a unique, application-based sizing tool that quickly and easily identifies the just-right planetary gearhead for your application.

New Micron MOTIONEERING Features & Highlights:

- **Easy sizing & selection.** Stainless steel AquaTrue and drop-in replacement XTrue products now added to complete the full Micron product offering available for sizing and selection.
- **CAD models, technical specifications.** Quickly configure and download 3D models along with detailed printable & emailable specifications including configuration parameters, life calculations, motor sizing and more.
- **Easy to understand.** Improved user experience with upgraded user interface based on professional user experience testing & design. Simply enter a few key application parameters and Micron MOTIONEERING instantly delivers all the information needed to specify and order the optimum gearhead for the application.
- **Competitive cross reference.** Easily identify the right drop-in replacement for commonly found gearheads.

Micron MOTIONEERING is an intuitive tool that greatly simplifies gearhead sizing and selection to help OEMs **optimise their machine design in a fraction of the time** it can take with manual

calculations and paper catalogue look ups.
